

MOHAMMAD TANZIL DILAWAR MESTRI

📞 9483375638 ✉️ tanzilmestri7204@gmail.com  LinkedIn  Github  Portfolio

ABOUT ME

ECE undergraduate with experience in embedded systems, IoT, AI model support, and software development. Passionate about C/C++ , embedded programming, intelligent thermal systems, and innovative technology solutions. Skilled in problem-solving, sensor integration, and real-time monitoring systems.

EDUCATION

B.E. IN ELECTRONICS & COMMUNICATION ENGINEERING – KLS VISHWANATHRAO DESHPANDE INSTITUTE OF TECHNOLOGY, HALIYAL (VTU) 2022 – 2026 | CGPA: 8.66
PUC (SCIENCE) – JSS RSH COLLEGE, DHARWAD | 2022 | 82.33%
SSLC – RLS HIGH SCHOOL, DHARWAD | 2020 | 86.24%

INTERNSHIPS & TRAINING

Arctictern Solutions Pvt Ltd | Trainee Engineer | Jan 2026 – May 2026

Supported AI and ADAS development through computer vision model testing, image analysis, validation, and optimization to improve accuracy and system performance.

PROJECTS

1. Peltier-Based Non-Conductive Liquid Cooling System

- Developed an intelligent thermal cooling system using Peltier modules and non-conductive liquid cooling techniques
- Integrated ESP8266 and sensors for real-time temperature monitoring and automated cooling control
- Implemented embedded programming for efficient thermal management and IoT-based monitoring
- Focused on improving cooling efficiency for electronic systems and thermal-sensitive devices

2. Thermal Conductivity Measurement Device

- Developed a device for measuring thermal conductivity and analyzing heat transfer efficiency
 - Integrated sensors and embedded components for accurate thermal data acquisition
 - Worked on real-time monitoring and system optimization techniques
 - Focused on improving precision and reliability in thermal analysis applications
-

Publications & Certifications

1. Enhanced Thermoelectric Cooling System Using Peltier Module with Optimized Proprietary Coolant and Intelligent Control Architecture | Apr 24 2026

Published patent based on smart thermal management and cooling optimization techniques
Focused on energy-efficient cooling solutions using intelligent embedded system integration

2. Embedded Systems Internship Certification

3. Generative AI Fundamentals

4. Python Programming for AWS

SKILLS

- Programming Languages: C , C++ , Python
- Web Technologies: HTML5, CSS3
- Embedded Systems & IoT: ESP8266, Sensor Integration , Embedded
- Programming Core Concepts: OOPs, DB Design , Embedded Systems , Microcontrollers
- Tools & Platforms: VS Code, Git, Arduino IDE , keil micro vision, Matlab
